Massachusetts License/ID has NEW Security Features!

(see back panel for visual of Adult card)

Kinegram®
Positioned to intersect the portrait, the Kinegram® color and images change as the card is rotated and turned. This feature can be viewed by tilting the card at various angles.

Laser Perforation
The state outline is embedded into the card stock. It can be observed by holding the card up to any light source and does not require any other equipment to verify.

Tactile Features
Multiple instances of an applicant's personalized data are applied via laser. The features are visible as well as tactile. The tactility can be felt by running a finger over the data.

Laser Write
The cardholder's initials and year of birth appear within the Kinegram®. This feature can also be viewed when backlit, using a flashlight.

Ultraviolet (UV) Ink
Ultraviolet sensitive inks are embedded within the security background design allowing for authentication under an ultraviolet light source.

Multiple Data Placements
The individual applicant's data is placed at various locations on the front and back of each document.

Barcodes
The 1D and 2D Barcodes contain demographic data and identification numbers, unique to the cardholder.

Ultraviolet (UV) Ink -
Visible only with UV light source

MASSACHUSETTS

A Guide to the New License and Identification Card

Registrar Erin Deveney

Dear Colleague,

The Massachusetts Department of Transportation, Registry of Motor Vehicles (RMV) Division, is pleased to introduce you to the next generation of Massachusetts driver's licenses and identification (ID) cards. Beginning July 2016, all license and ID cards issued by the RMV will be produced using the new design.

Governor Baker, Secretary Pollack and I are strongly committed to maintaining the security and integrity of the Commonwealth's most important identification documents. The new driver's license and ID cards, highlighting the proud history of Massachusetts, have been crafted with a distinct and innovative design and with more unique security features than ever before. Our new driver's license and ID cards remain among the most secure and technologically advanced in all of North America.

This brochure highlights the newly designed driver's license and ID cards. It will guide you through the key enhancements and unique security features impacting how you verify authenticity.

We are pleased to acknowledge MorphoTrust USA, a Billerica-based company, as a partner in the design and production of our newly designed driver's license and ID cards.

For more information on the new Massachusetts driver's license and ID cards, please visit www.massrmv.com.

Sincerely,
Erin C. Deveney
