

Town Common Policy

May 24, 2004

The Board of Selectmen recognizes that the Town Common is a public space and, therefore, permission of the Town is not required for its lawful use by groups or individuals. However, because electrical service is available on the Town Common and because an underground sprinkler system is in place, inquiries or requests for the use of the Town Common should be referred to the Public Safety Committee and Town Common Committee. Recommendations can then be made by these Committees regarding the use of electricity, location of underground systems, crowd control and other public safety issues.

Copies of any recommendations made should be forwarded to the Board of Selectmen for the public record.

Forward to Town Common Committee and Public Safety Committee.
Suggest that standard guidelines be adopted.
