

# DEPARTMENT OF PUBLIC WORKS

## WASTEWATER TREATMENT FACILITY UPGRADE PROJECT

### PUBLIC MEETING ANNOUNCEMENT

The Town of Uxbridge Department of Public Works recently finalized the draft of the Comprehensive Wastewater Management Plan (CWMP), which evaluated the alternatives associated with the proposed upgrades to the Wastewater Treatment Facility (WWTF). You are invited to attend a series of **Informational Meetings**. The meetings will provide the latest project information on the upcoming Special Town Meeting Article and planned permit related improvements required under the USEPA NPDES Discharge Permit. No formal presentation will be given. You may arrive at any time during the meeting hours and walk through to view informational materials at your own pace. Representatives from the Town Manager's office and the Project Team will be available to discuss project-related issues and answer questions.

**The purpose of the informational meetings is to:**

- Provide information in support of the proposed Special Town Meeting Warrant Article
- Review the NPDES permit requirements and need for improvements
- Explain the penalties the Town will face if the project does not proceed
- Provide an overview of the proposed plant upgrades

**What is the next step?**

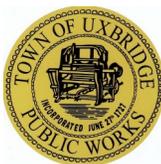

We are requesting Town Meeting authorization to appropriate a sum of money for the construction of the Wastewater Treatment Facility upgrades; to determine whether this appropriation shall be raised by the borrowing from the Massachusetts Water Pollution Abatement Trust or otherwise. The DPW is concurrently working on the design plans and specifications in order to maintain compliance with our Order of Consent from the USEPA.

**Where can I get more details?**

At the onset of the receipt of the new USEPA NPDES permit, the DPW created a project website. This web site was updated after each of the BOS updates that have been given over the past few years. The purpose of the website is to provide the public access to project related documents (i.e. presentations, permits, etc.). Additional documents will be uploaded as they are finalized. For additional information on this project, please visit the DPW's Comprehensive Wastewater Management Plan website at:
