

TOWN OF UXBRIDGE PRESENTS

EAST HARTFORD CAUSEWAY COMMITTEE

The Committee will be charged with developing a long and short-term strategy to alleviate the problem of safety on the East Hartford Avenue Causeway, through a redesign and rebuild of the affected area.

The Committee will address long term solutions like developing design plans for improvements to the causeway. This will include potential costs for building a separate pedestrian crossing, or improvements to the existing causeway.

Design, construction, and permitting costs should all be evaluated and reported to the Board of Selectmen after consultation with the DPW Director, Police and Fire Chiefs.

The short-term plan for the Committee to consider will include items such as: speed restrictions and/or truck limitations along the causeway to be implemented as soon as possible.

The Committee will also conduct outreach to nearby properties and to Mass DOT for design input.

The Committee will commence on August 1, 2023, with the dissolution of the Committee at the completion of project upgrades.

PLEASE COMPLETE A TALENT BANK FORM IF YOU ARE
INTERESTED IN VOLUNTEERING; FORM CAN BE FOUND ON
THE TOWN WEBSITE.
